CAUTION: For safety and handling purposes we recommend appropriate protective measures when entering a wet vessel containing activated carbon, because wet activated carbon depletes oxygen from the air and therefore, dangerously low levels of oxygen may be encountered. In such a case, the oxygen level inside the vessel shall be determined before entering and appropriate protective equipment shall be worn when entering, or leaving the vessel open until oxygen level in the vessel is normal. This information is given in good faith, but no warranty, expressed or implied, is made.
